FOOD PROCESSING MACHINERY

EASY FLOW™
30 SECOND COOLER

VERY HIGH SPEED PARTICULATE COOLER

EASY-FLOW™ COOLER

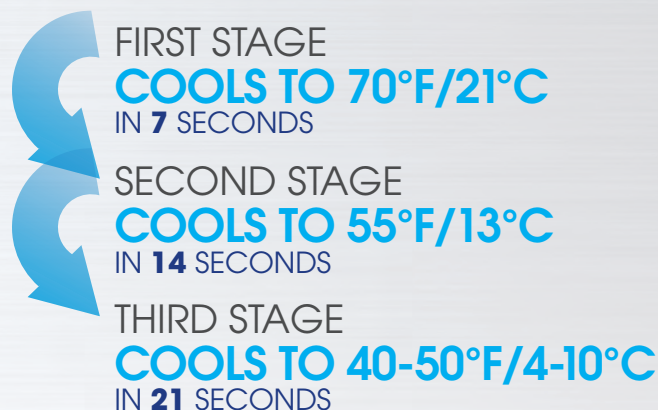

HIGH CAPACITY PARTICULATE COOLER

SINGLE-STAGE COOLER

IT REALLY CAN COOL PASTA IN 30 SECONDS

...and it can cool many other foods just as quickly, from 200°F/94°C to 40°F/4°C in seconds:

HOW IT WORKS

Product is gently pulled into a patented venturi action water plenum, where it is mixed with cold or chilled water which rapidly removes heat. Product is then discharged across a dewatering screen to the next step which, may be more stages of Easy-Flow cooling.

BENEFITS

- Tremendous efficiency
- Uniform cooling
- Reduces freezer costs
- Small footprint
- Easy-to-clean design

Use ambient city water or well water in first stage - then REUSE heated water as preheated blancher makeup water for major energy savings!

SUGGESTED APPLICATIONS

SPAGHETTI

PASTA

VEGETABLES

RICE
