EASY-FLOW™
ULTRA FAST COOLER

PARTICULATE COOLING IN 7-21 SECONDS

EASY-FLOW™ COOLER

Easy-Flow™ Single Stage Cooler
48 in. x 48 in. x 60 in.
(121.9 cm x 121.9 cm x 152.4 cm)

HOW IT WORKS

A gentle patented venturi action water plenum pulls products into a hopper where it is mixed into cold or 33°F (1°C) chilled water.

COOLS PASTA, RICE AND MORE IN 7 SECONDS

The chilled water cools 200°F (94°C) product to 70°F (21°C) in **7 seconds** and moves up a dewatering screen to the next cooler in the series.

Two coolers in the series will cool 200°F (94°C) product to 55°F (13°C) in **14 seconds**.

Three coolers in the series will cool 200°F (94°C) product to 40°F-50°F (4°C-10°C) in **21 seconds**.

WATER REUSE SYSTEM

24 INCH DIAMETER FILTERING SYSTEM

Blancher, cooker, or cooler waters are ideal for screening and re-using to generate energy savings. These significant savings can yield ROIs of less than 12 months.

SUGGESTED APPLICATIONS

SPAGHETTI

PASTA

VEGETABLES

RICE
