

**LYCO**  
*Manufacturing, Inc.*

THE *EXPERTS* IN INNOVATIVE  
FOOD PROCESSING MACHINERY

**DUAL CANISTER  
FILTERS**

6-in Manual System

8-in Fully-Automated System

## DUAL CANISTER FILTERS- ADVANCED AND SANITARY FILTERING SYSTEM

Lyco's innovative dual-canister system provides uninterrupted production, even through a filter foul or plug. Flow can easily be rerouted to the clean filter, allowing the plugged filter to be removed and cleaned while production continues.

- Dual filters
- T-304 sanitary construction
- Stand mount - filters are mounted horizontally for easy removal and changeouts
- Rack system for filter inserts - convenient access for cleaning or spares
- 50-400 GPM depending upon application

### SYSTEMS AVAILABLE:

- Manual or fully-automated
- 6-in or 8-in diameter
- Perforated or wedge-wire filter inserts
- Optional: Automated filter purge based on an adjustable combination of pressure drop and time
- Manual systems can be upgraded to automated systems at a future time

### SUGGESTED APPLICATIONS

POULTRY

MEAT

PORK

VEGETABLE

POTATOES
